## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 42-53 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a linear light-emitting element comprising various elements as claimed, more specifically, a first region, a semiconductor region, a light-emitting region and a second region arranged from nearly a center to a fringe of a cross section approximately vertical to an axis of the linear light-emitting element."

U.S. PG Publication 2001/0026125 A1 to Yamazaki et al. teaches a light emitting device with a first region, a semiconductor region, a light-emitting region and a second region arranged from nearly a center to a fringe of a section as discussed in the action dated 5/27/2009. However, Yamazaki does not teach that from a center to a fringe of a cross section approximately vertical to an axis of the linear light-emitting element, there is a first region, a semiconductor region, a light-emitting region and a second region arranged, wherein in the semiconductor region, a plurality of gate electrodes are arranged in a shape of an island and a nearly concentric circle.

Additionally, U.S. Patent 6,538,375 B1 to Duggal et al. teaches an OLED fiber light source (title) that is a linear light-emitting device but fails to teach a semiconductor region with a plurality of gate electrodes are arranged in a shape of an island and a nearly concentric circle.

Art Unit: 2889

JP 2000-182770 to Masatka also teaches a linear light-emitting device but fails to teach a semiconductor region with a plurality of gate electrodes are arranged in a shape of an island and a nearly concentric circle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
